

Instructional Sheet for Care Management Referral Form

BMC HealthNet Plan offers care management services to members with chronic and complex medical/behavioral health conditions and identified socioeconomic barriers to assist members and their providers to manage their condition and follow the prescribed treatment plan. We partner with Beacon Health Strategies to offer integrated care management to those members with a dual diagnosis.

In an effort to better support our providers and members, BMC HealthNet Plan has instituted a Care Management Referral Form that providers may complete and fax directly to us when your office has determined that a member may benefit from the care management services we offer.

Care Management Services Offered

Population Management is an intermediate-level care management program with a focus on helping members develop self-management skills, arranging services and providing health education for members with specific medical, behavioral and social needs. In addition, Population Management interventions may include smoking cessation, diet and nutritional counseling, wellness and prevention, and others for the following targeted medical populations:

- Diabetes
- Heart failure (HF)
- Hypertension
- Pregnancy and high risk pregnancy
- Asthma
- Coronary heart disease
- Chronic obstructive pulmonary disease (COPD)
- Obesity

Complex Care Management targets the most complex, highest risk members, including those with special health care needs for which a multidisciplinary approach is utilized, focusing on helping members develop self-management skills, arranging needed services and providing education to meet the varied health needs of this population.

Medical conditions that may be appropriate for a care management referral include but are not limited to:

- Cancer
- Bariatric surgery
- HIV
- CVA or other degenerative neurological or neuromuscular disorders
- Spinal cord injury/ traumatic brain injury /anoxic brain injury
- Complex newborn/NICU stay
- Neonatal abstinence syndrome / shaken baby syndrome

Indications that a patient may benefit from a referral to Complex Care Management for **any medical condition** include but are not limited to

- An illness or event that has caused a change or decline in ability to self- manage
- 5 or more chronic condition medications
- 5 or more different Specialists
- An Acute Inpatient stay with LOS > 7 days
- Multiple admissions/readmissions
- Multiple or repeated Emergency department use
- Homelessness, poor or inadequate living environment

How to Complete the Care Management Referral Form
